LEGACY MONOLITH DECOMMISSIONING AUDIT REPORT (2025)

Department: Engineering / Architecture
Status: FULLY RETIRED & ARCHIVED

1. EXECUTIVE SUMMARY
In Q4 2025, the legacy Java monolith was completely phased out in favor of the asynchronous microservice and polyglot architecture.
All 140 physical blade servers across Dallas datacenter were wiped according to DoD 5220.22-M standards.

2. DATA MIGRATION VERIFICATION

100% of relational records were migrated into PostgreSQL with ACID constraints.

All historical attachments were ingested into distributed object storage and validated against SHA-256 checksums.
